Credits Required to Graduate 12 credits

## **Required Courses**

18155 Public Health Theory & Practice. 3 credits.

This course provides an overview of various theories in public health, as well as, how public health theories can be applied in individual, interpersonal, and community settings. The course will highlight various factors that contribute to public health, including biological, family, ethnic and cultural, and community stressors that affect health and well-being. The course will provide an overview of translating research into public health practice.

18203 Public Health Administration. 3 credits.

Public health professionals require administrative skills at many levels, from managing personnel and health programs, to making and advocating for organizational and policy decisions regarding the distribution of society's scare public health resources. This is a survey course designed to introduce 1) the structure, functions, and financing of public health within the context of the U.S. healthcare system and its health policies; 2) the planning, implementation, management, and evaluation of programs to improve health; and 3) principles of effective finance, budgeting, grant -writing, and management strategies. In addition to tutorials, readings and case studies, students will complete assignments that are aligned with their own communities, organizations, and professional roles.

18204 Public Health Analytics. 3 credits.

This is a required course for students matriculated in the Master of Public Health or Certificate in Public Health programs. The overall goal of the course is to provide the students with an opportunity to read, cr itically reflect, actively discuss, and write on public health research analytics. The materials in this course provide a basis for understanding concepts and applications critical to public health in the context of applied research. The students will develop knowledge and training in the areas of research, analysis, and data management.
